Fruit Trees

U. S. Department of Agriculture

and

Berry Bushes

1948

Leslie H. MacRobbie, Owner

South Country Road
EAST PATCHOGUE
LONG ISLAND, N. Y.

Telephone Patchogue 232

No. 48-3

TERMS

Cash, excepting established accounts, to which we will gladly extend 30 days credit, or longer where specific arrangements are made at the time of sale.

PRICES

Prices quoted cancel all previous quotations, are subject to change without notice, and to prior sale. Prices are F.O.B. East Patchogue nurseries. Delivery is extra at cost.

SHIPMENT

Please give explicit instructions. We ship by our own trucks, freight, express and parcel post. Delivery with our own trucks expedites arrival and insures a minimum amount of handling.

BALLING AND BURLAPPING

All fruit trees and berry plants are dug with bare roots at quoted prices unless otherwise listed. If a ball of earth is advisable or desired by the customer, there is an extra charge for it. See B&B Schedule in our general price list.

PACKING AND BOXING

Packing and boxing, where necessary, is charged for at cost.

PLANTING

If labor is available at the time your order is to be delivered, we shall be glad to furnish experienced plantsmen to do the planting. Ask for the cost of this service.

In addition to our stock of fruit bearing trees and berry plants, we also grow a large and comprehensive stock of hardy ornamental evergreens, evergreen shrubs, shade and ornamental trees, shrubs, vines, and climbing roses. Visitors are always welcome to inspect our nurseries. Ask for our general price list.

Cross Pollination

Varieties marked with an * are generally self-unfruitful, but will bear if planted with a pollenizing variety — marked "P."

STANDARD APPLES

3 year medium	\$ 2.70
3 year heavy	3.60
4 year	4.80
5 year	6.30
6 year	8.10
7-8 year	11.25

Pot Grown	12.00 per 100	
Dorsett	Wild strawberry flavor	Early
Fairfax	Superior variety	Early
Premier	Extra heavy bearer	Early
Catskill	Very large, heavy bearer	Midseason

HERE'S SOME INFORMATION TO HELP YOU GROW GOOD FRUIT

Number of Plants Recommended for an Average Family

Asparagus or Rhubarb	50-100
Blackberries or Raspberries	10-50
Blueberries	3-10
Currants or Gooseberries	10-20
Grapes	3-10
Strawberries	25-200
Fruit trees (each kind)	2-6

How Long Before Fruit Trees Will Bear Some Fruit After Planting?

3 year apples	2 to 4 years
3 year plums	1 to 2 years
3 year pears	2 years
3 year sour cherries	1 to 4 years
3 year sweet cherries	2 to 3 years
3 year quinces	1 year
3 year peaches	1 year

How Far Apart to Plant Them?

Standard Apples	25 to 30 feet
Cherries and Pears	18 to 20 feet
Peaches	16 to 18 feet
Plums and Quinces	10 to 12 feet
Grapes	6 to 8 feet
Blackberries and Raspberries	3 to 4 feet
Blueberries	4 to 5 feet
Currants and Gooseberries	3 to 4 feet
Strawberries	12 to 15 inches
Rhubarb and Asparagus	10 to 12 inches

Cross Pollination

Varieties marked with an * are generally self-unfruitful, but will bear if planted with a pollenizing variety—marked "P."

Spraying and Fertilizing

A general home orchard spray, which is not "fool proof," but will do for most insects and diseases on fruit trees, berry plants, and vegetables:

Wettable Sulphur	5 lbs.
Lead Arsenate	2 lbs.
Rotenone	3 lbs.
Total	10 lbs.

Mix the 3 powdered chemicals with 100 gallons of water, or reduce in same proportion for smaller amounts of water. Apply four times yearly as follows: (1) Before blooming, (2) After blooming, (3) Memorial Day, and (4) Fourth of July.

Well-rotted horse or cow manure is the best fertilizer for all fruits. Use a heavy mulch in early spring and late fall.
